

GADING RADITYA PRATAMA

[+6285778072040](tel:+6285778072040) | gadinggraditya77@gmail.com | <https://linkedin.com/in/gadinggraditya>

Jalan Bina Karya Blok AA7 No.53, Pondok Kelapa, Jakarta Timur

I am a Informatics graduate from Gunadarma University with a strong focus on Web Development. I specialize in modern Frontend technologies, particularly React.js, to build interactive, responsive, and user-friendly interfaces. Additionally, I am passionate about full-stack JavaScript development, with hands-on experience bridging Frontend design and Backend integration to deliver end-to-end web applications

EDUCATION

Universitas Gunadarma

Bachelor, Informatics | GPA: 3.87/4.00

- Graduated with a GPA of 3.87 out of 4.00 (Cum Laude)
- Focused on Web Development

Jakarta

July 2022 - August 2026

SMAN 59 Jakarta

High School, Science

Jakarta

June 2019 - May 2022

WORK EXPERIENCE

PT. JUARA ANGKUTAN SEJAHTERA LOGISTIK

Frontend Web Developer, Freelance

Jakarta

May 2025 - June 2025

- Developing user interfaces (UI) for JasExpress, a logistics and cargo shipping service platform
- Implementing React.js for the frontend and Tailwind CSS to create responsive and interactive designs
- Collaborating in building UI components optimized to enhance user experience
- Ensuring all UI elements are responsive across various devices and screen sizes

SKILLS

Soft Skill	Teamwork, Collaboration, Open-mindedness, Time Management, Work Ethic, Responsibility, Teamwork
Hard Skill	HTML, Node.js, PHP, React, JavaScript, CSS, MongoDB, Express.js, PostgreSQL
Software	GitLab, Visual Studio Code, Firebase, Canva, Postman, GitHub, Figma, Git

CERTIFICATION

React & Back-End with AI, Dicoding Indonesia, Nomor: ASAH/GRAD/XXVI-01/R891D5Y0666, 01 Jan 2026

LANGUAGE

Indonesia	English
proficient	elementary

PORTFOLIO

Dokterklik

- Developed a full-stack doctor appointment booking web application named "Dokterklik," utilizing React.js for the frontend and Node.js for the backend
- Implemented a secure user authentication system to manage login sessions for both patients and doctors
- Built a dynamic doctor schedule management feature to facilitate real-time appointment booking
- Integrated an online payment gateway to process consultation payments automatically and responsively.

CornDoc

- Developing a Flutter-based mobile application to automatically detect corn leaf diseases using digital image processing
- Integrating a machine learning model (TensorFlow Lite) into the mobile application to perform inference locally on the device

- Implementing camera and gallery integration features, as well as Firebase services (Cloud Firestore & Firebase Storage), to manage data and detection history
- Designing a responsive user interface (UI) incorporating Lottie animations, Shimmer effects, and image caching to optimize the user experience

COURSES

React & Back-End with AI	Online
<i>Dicoding Indonesia</i>	August 2025- January 2026
• Mastering modern web application development using React.js for the frontend • Integrating AI-based back-end systems to enhance application functionality • Completing intensive training in web architecture design and data management • Implementing AI-powered features to improve application performance
